about

HOME EQUIPMENT SAFETY

The same outdoor home equipment we use to beautify our home can spark a fire that will destroy it. A number of wildfires each year are started when heat from exhaust systems ignite grasses.

Homeowners can do their part by following these tips:

- ✓ Refrain from operating on or near dry vegetation.
- ✓ Inspect equipment prior to use.
- ✓ Refuel once the engine is turned off and cooled.
- ✓ Store gasoline in approved safety cans and out of reach of children.
